- ALL WATCHBOX FUNCTIONS
- WIFI
- BLUETOOTH
- USB PORTS
- GSM / 3G MODEM READY
- HDMI PORT
- DUAL CORE MICROPROCESSOR
- ANDROID OS

## • WHAT IS IOTREE CLOUD? •

The Iotree monitoring and automation system allows sensors and devices to be sensed and/or controlled remotely via internet in real time. Our system gives you the opportunity for direct integration physical devices into our cloud based platform resulting in efficiency and economic benefit.

## • FEATURES •

### ANDROID BASED CENTRAL UNIT

Provides connection between the sensors, actuators and the system\*.

\*please note the Android Hub is not relevant for those users, who buy an integrated system.

### CLOUD BASED SOLUTION

This system gathers the data from sensors, organize and store in the cloud, this data is then accessible anywhere, on any device via internet web-based system.

### PERSONALIZED USER INTERFACE

While we attempt to set everything up in a user friendly way, the power is still yours to reorganize your devices' specifications. Take control now!
