- **Offer**

Application

- **A combination of a cold pack and a large, super absorbent sanitary towel with strips for single use only during the postnatal period (2 in 1)**
- **Does not contain any chemicals, non-allergenic product**
- **An important supply of a hospital birth package**

Perineal Cold Pack provides the much needed soothing and cooling relief to new Mothers aches and pains associated with natural birth (vaginal tear, incision and hemorrhoids). It offers maximum comfort and protection with minimal nursing intervention, so the new Mom can focus on her baby and rest easy.

Made of soft material, our Perineal Cold packs provides safe, controlled, effective thermal therapy and increased absorbancy. An adhesive strip keeps pad in place for extra security and convenience.

MomCare

Instant Ice (Cold Pack)
After birth perineal compress and pad (2 in 1)

MomCare

Instant Ice (Cold Pack)

Advantages

- **Cold therapy for lying-in women to alleviate pain, hyperaemia, detumescence**
- **Cold pads are applied intermittently for 36-48 hours after delivery**
- **Pads contains a built-in ice pack to relief the pain instantly and are highly absorbent so they don't need to be changed as often**
- **Reduces swelling**
- **Sustains temperature for above 30 minutes**
- **Large sized pad decreases number of pad and linen changes**
- **Combination of cold and padding greatly increases patient comfort**
- **Easy to activate – just twist!**
- **No freezing or refrigeration required**
- **Full length adhesive strips eliminate need for belts**
